Hi Wes:

Just wanted to let you know that I'm going to fly home tomorrow for a quick home visit to pay bills and check on my house.... Then return to Odessa on Monday. Heth Parnell and Paisley Robards from Weston will be here tomorrow and Monday.... Heth has to head for Minden, LA with Paige later on Monday and will be out there most of the upcoming week.

Paisley and I will be on site probably for the rest of the week until CTEH completes the 8 hour NIOSH air sampling which will officially clear the school for re-entry by students/staff. Things are going much better today and we can finally see the light at the end of the tunnel. Only about 20% of the school is still "contaminated" and needs remediation and then re-testing.... I think this might be done by Tuesday or Wednesday with the 8 hour NIOSH sampling by Wednesday or Thursday (results back by Thursday or Friday). If all goes well, we hope to be headed home by Friday.

Tomorrow I will do a new TA for travel back to the site on Monday.

Just let me know if you have questions/concerns.

Thanks, Wes!
